# Atishay Kasliwal

Software Engineer | 934-246-1198 | katishay@gmail.com | Linkedin | Github | Portfolio | New York, NY

## Education

**Stony Brook University** — Stony Brook, New York
*Master of Science in Data Science* — *Aug. 2024 – May 2026*

**Symbiosis University of Applied Sciences** — Indore, Madhya Pradesh
*Bachelor of Technology in Computer Science and Information Technology* — *Aug. 2018 – May 2022*

## Experience

**Stony Brook University** — November 2024 – Present
*Software Engineer | Python, GitHub Copilot, AI SDLC, React, AWS, FastAPI, TypeScript* — *Stony Brook, NY*

- Led end to end development of a React, TypeScript, and FastAPI FOMC platform to cut multi-model review from 30+ minutes to under 3 minutes for 2,000+ users.
- Integrated AI-assisted development with GitHub Copilot into the SDLC, adding routine security and vulnerability reviews to the FOMC platform ahead of code review.
- Generated 27% paper trading returns and $2.6K profit over 18 months by building a real time Python trading signal pipeline on AWS (SQS, SNS, S3) processing 200K+ financial records.
- Architected Python FastAPI microservices with DynamoDB and RESTful APIs to serve structured financial data at 300ms P99 and 99.9% uptime across distributed research workflows.
- Built a TypeScript RESTful API on EC2 with JWT auth to expose structured FOMC data to 10+ developers.

**Wake Forest - CAIR (NSF & NIH Funded)** — May 2025 – August 2025
*Software Engineer Intern | Python, PyTorch, AI SDLC, React, TypeScript, GCP* — *Winston-Salem, NC*

- Developed a HIPAA compliant imaging pipeline in Python and PyTorch on GCP using GitHub Copilot, cutting clinical processing from 20+ to 5 minutes at 90% accuracy across 10,000+ patient cases.
- Delivered a React and TypeScript dashboard to 8 radiologists for tumor mask review and radiomics retrieval.
- Provisioned GCP with Terraform and Firebase for 10+ independent MRI radiomics pipelines across 50K+ scans.

**Accolite Digital** — August 2021 – August 2024
*Senior Software Engineer | Java, Spring Boot, Python, AWS, Kafka* — *Hyderabad, TG*

- Architected an event driven ETL pipeline for Fidelity using Kafka, Airflow, Java, and Spring Boot to ingest 250K+ daily transactions across 10+ enterprise integrations into PostgreSQL with 99% uptime.
- Optimized distributed system performance for 100K+ users by rearchitecting Redis caching and Elasticsearch layers to cut P99 latency by 40% with zero Sev1s across Jenkins deployments.
- Built a serverless data platform in Python and AWS Lambda, automating async workflows for 3K+ users via REST API integrations.
- Secured 10+ Fidelity microservices with Spring Security, OAuth2, and JWT authentication with 99.9% uptime.
- Developed a CRM app in React and TypeScript with Spring Boot to cut page load time by 35% for 5K+ users across customer-facing teams.

## Projects

**Atriveo** | *Python, FastAPI, AI SDLC, React, PostgreSQL, Cloudflare Workers* — September 2025 – Present

- Built Atriveo, a full stack platform in Python, FastAPI, React, and PostgreSQL on Cloudflare Workers using Claude Code, serving 1,000+ active users at 2K+ daily queries with 99.9% uptime.
- Shipped a 5.0-star Chrome extension with one click capture from 20+ ATS platforms and automated 6-source ingestion that processes 1K+ daily postings and filters 75% noise.

**Insurance Microservices Platform** | *Java, Spring Boot, Kafka, Elasticsearch, Redis* — June 2025 – August 2025

- Architected an event driven insurance platform in Java, Spring Boot, and Kafka with CQRS and event sourcing, routing policy events through a 3-node cluster across 8 services into Elasticsearch.
- Secured all 8 services with JWT, BCrypt, and Redis rate limiting at 5 req/s, and instrumented Prometheus, Grafana, Zipkin, and ELK observability across every gateway route.

## Technical Skills

**Languages**: Java, Python, TypeScript, JavaScript, SQL
**Frontend & Backend**: React, FastAPI, Spring Boot, Spring Cloud, REST APIs, GraphQL, Microservices
**Security & Data**: Spring Security, OAuth2, JWT, PostgreSQL, DynamoDB, Redis, Elasticsearch, Kafka
**Cloud & DevOps**: AWS (Lambda, EC2, S3), GCP, Docker, Kubernetes, Terraform, Jenkins CI/CD, Git
**AI-Augmented Development**: Claude Code, GitHub Copilot, Cursor, Codex CLI
